

BILLING PERCENTAGE RATE BASED ON MONTHLY PRACTICE REVENUE

As your medical billing team, our goal is to decrease your out of pocket costs and increase your monthly take home pay.

We strive to provide excellence and efficiency with each of our providers. Some costs you can save on by outsourcing your medical billing include: Less office space rental, employment insurances, taxes and more. The current national average for outsourcing medical billing is 6.5%-10.0%. However, to give incentive to our providers we have created a sliding scale for our fees to alleviate costs as your practice grows. Please review below and contact our team with any questions you may have regarding our pricing.

Our sliding scale operates on a quarterly basis. The percentage rate at which we bill is based on the prior quarters average. For example, if your practice average moves you from one bracket to the next based on the average revenue of the first quarter, that new percentage will be applied to your account for the next quarter.

If you have any questions regarding our fees, please contact our CEO, Rachel Bears.
